

East of England Neonatal ODN AHP Psychology Team Special Care Study Day– Optimisation for Discharge and Beyond (virtual) 11th October 2022, 09:00-15:30

Come and join us for an interactive day exploring how we can support families during their time in the special care area and prepare them for a successful discharge.

From nursery nurse to ward manager, all attenders will gain a greater insight into how they can deliver care which is developmentally and FiCare focused.

The programme has been carefully curated and will be delivered by our Allied Health Professional team and will include:

- Supporting sensory development
- Positioning to optimise development on special care and beyond
- Psychologically preparing families for home.
- Supporting family choice—bottle feeding and teat selection and flow
- Post discharge nutrition and weaning the preterm baby
- What's new? A look at the latest research
- Learning from Experts by Experience

The cost to those working within the East of England Neonatal, SIC or Paediatric Critical Care network is £10. Applications from individuals outside of these specialties or region are welcomed at a cost of £20.

Booking forms can be found at <https://www.eoneonatalpccsicnetwork.nhs.uk/events/special-care-study-day/>

This event has been sponsored by Medela and Draeger through the purchase of virtual exhibition space
